

S E R V E R

Squeeze exceptional into every single dish.

Convenient, versatile squeeze bottle holders.

SIMPLE, EFFICIENT AND READY TO SERVE.

Heated Squeeze Bottle Solutions

Compact warmers fit tight spaces, holding toppings and sauces where needed. Temperature-sensing thermostats prevent overheating, while insets neatly hold 3 or 6 squeeze bottles.

Chilled Squeeze Bottle Solutions

Open-frame design with lid allows cold air to circulate but not escape, keeping bottles up to 10°F colder than holding in pans. Compatible with 16 oz. FIFO™ or TableCraft® bottles, and available in 3, 4, 6 or 8-bottle configurations. Solutions available for thermoelectric and insulated countertop holders or cold table drop-in applications.

FastFill™ Squeeze Bottle Filler

Quickly fill squeeze bottles from bulk packaging with no mess. The lever-operated dispenser applies pressure to a 1 1/2-gallon bag with a 16mm fitment for fast and thorough evacuation.

SMARTER IS BETTER

The FastFill™ mess-free alignment feature ensures squeeze bottles are properly positioned every time for easy refilling.

Pair a Server IntelliServ™ warmer, chiller or insulated mini station with pumps, ladles or squeeze bottles to speed service and increase efficiency.
